

Theses

Ditte Andersen

Ditte Andersen
Tapon Laboratory
Characterisation of four *Drosophila* proteins involved in regulation of gene expression (2008)

Emilie Bureau
Bonnet Laboratory
Investigation of the role of Haematopoietic Cell Kinase in and leukemic haematopoiesis (2008)

Joao Cordeiro
Way Laboratory
Modulation of Rho GTPase signalling during vaccinia virus infection (2008)

Katia De Filippo
Hogg Laboratory
The role of macrophages and mast cells in neutrophil recruitment (2008)

Diana Huttner
Ulrich Laboratory
Insights into the interaction between Replication Protein A and the Ubiquitin Ligase Rad18 from *S.Cerevisiae* (2008)

Vitaliy Kuznetsov

Vitaliy Kuznetsov
Cooper Laboratory
Cell cycle-dependent modification of Pot1 and its effects on telomere function (2008)

Marc Offman
Bates Laboratory
Protein Structure Prediction and Refinement (2008)

Li-Kun Phng
Gerhardt Laboratory
A study of Notch signalling in vessel morphogenesis during developmental angiogenesis (2008)

Sophie Pinner
Sahai Laboratory
Mechanisms of Cancer Cell Motility *in vivo* (2008)

Ofer Rog
Cooper Laboratory
Characterization and consequences of telomere replication gone awry (2008)

Christine Schmidt
Uhlmann Laboratory
Genomic analysis of cohesin dynamics in fission yeast (2008)

Stefania Segditsas
Tomlinson Laboratory
Mechanisms of intestinal tumorigenesis resulting from APC mutations (2008)

Yingdi Wang
Adams Laboratory
Regulation of the angiogenic growth of blood and lymphatic vessels by ephrin-B2 (2008)

Jordan Ward
Boulton Laboratory
Insight into homologous recombination at replication blocking lesions through analysis of the *C.elegans* RAD-51 paralog, RFS-1

Ina Weisswange
Way Laboratory
Analysis of Vaccinia virus actin tail nucleating complex dynamics (2008)

Li-Kun Phng

Sophie Pinner
